Question: I am the owner/operator of a farm that maintains Anhydrous Ammonia (AA) at or above the Chemical Facility Anti-Terrorism Standards (CFATS) Screening Threshold Quantity (STQ) for commercial sale and distribution to facilities that then use my business's product for treatment of crops. Is my facility eligible to claim the CFATS Agricultural Production Facility (APF) Top-Screen extension?

Answer: If your facility possesses COI at or above the STQ *for commercial sale and distribution*, your facility is **not** eligible to claim the CFATS APF Top-Screen extension for such COI, and you must comply with the CFATS regulation by submitting a Top-Screen. The facilities to which your business distributes, however, may be eligible for the APF Top-Screen extension for COI used during the application or treatment of crops.
