Question: What documentation will I be asked to provide or make available for the inspector during an Expedited Approval Program (EAP) Compliance Inspection (CI)?

Answer: The documents and materials an inspector may request from a facility during an EAP CI will not differ from the documents and materials that are requested of a facility during a regular compliance inspection. Documents that may be requested will be material which supports the facility's implementation of their EAP Site Security Plan (SSP) and demonstrates the facility's compliance with the Chemical Facility Anti-Terrorism Standards (CFATS).
